ABOUT

Hi, I'm Kane Justine A. Cometa, a 4th-year Computer Science student with a passion for Software Development and Data Science. I have gained practical experience in web, mobile, and software app development, alongside with data analytics and predictive model development. I am actively seeking opportunities to refine my skills and contribute to the cutting-edge data-driven technology solutions.

TECHNICAL SKILLS

Software Development

Data Analysis and Visualization

Predictive Modeling and Selection

React JS, Flask, Dash

Pandas, NumPy, SciPy

Scikit-learn

Agile Project Management

Prompt Engineering

ChatGPT

SOFT SKILLS

Problem Solving

Strategic Thinking

Communication

WORK EXPERIENCE

Full-Stack Software Developer Intern

PetroEnergy - IT Department | Apr - Jul 2025

- Developed a full-stack ESG data management system, from data modeling to deployment.
- Designed user interfaces and implementing system architecture for seamless functionality.
- Prepared documentation, training materials, and conducting system handover to end-users.

CERTIFICATIONS

CCIS Research Colloquium 2025

Mapúa MCL | June 2025

- **Skills:** Technical Communication · Critical Thinking · Research Synthesis

Data Analytics with Python

IBM | April 2025

- **Skills:** Data Analysis · Data Visualization · Predictive Modeling · Model Selection · Python · NumPy · Pandas · Scikit-Learn · SciPy

Generative AI: Prompt Engineering

IBM | April 2025

- **Skills:** Large Language Models (LLM) · Prompt Engineering · Generative AI · Artificial Intelligence (AI) · ChatGPT

Introduction to Front-End Development

Meta | Feb 2025

- **Skills:** Web Development Tools · HTML and CSS · Responsive Web Design · Front-End Development · User Interface

Agile Project Management

Google | Feb 2025

- **Skills:** Agile Project Management · Problem Solving · Coaching · Scrum · Influencing

CompTIA IT Fundamentals (ITF+)

CompTIA | Jul 2024

- **Skills:** Database Fundamentals · IT Concepts · Programming Concepts · Software Development

PROFESSIONAL DEVELOPMENT

GitHub Copilot Global Bootcamp

Microsoft Learning | June 2025

- **Skills:** GitHub Copilot · Codespaces · AI Agents · Prompt Engineering

Build With AI 2025

Google for Developers | May 2025

- **Skills:** Retrieval-Augmented Generation (RAG) · Google Gemini · Artificial Intelligence (AI)

Building AI Agents in Azure

Microsoft Learning | May 2025

- **Skills:** Microsoft Azure · AI Agents

PROJECTS

Kane - Portfolio Website

Personal Project | July 2025

- A personal portfolio built with React and Material-UI showcasing my projects, skills, and professional experience

“ESGDash”: Dashboard Web Application

OJT Project | April - July 2025

- Integrated a repository and interactive dashboard for data analysis and visualization with multiple chart types, and export capabilities

Web-based Institutional Research Repository

Thesis Project | Aug 2024 - March 2025

- Integrated user-friendly interface for managing and visualizing institutional research data with advanced search capabilities and data analytics dashboard

Procurement and Inventory Management Application

Academic Project | Dec 2023 - June 2024

- Integrated a simple user interface to facilitate company daily tasks (procurement and inventory management)

“Final Revelation”: Maze Game Software Application

Academic Project | March 2024

- Integrated with an interactive puzzle game interface which can be controlled using keyboard

“Money co.”: E-Money Sending Mobile Application

Academic Project | May - June 2023

- Integrated a simple user interface for managing user finances (e-money) using the mobile application
